Goldenberg Snarecoil™ Bone Marrow Needles & Trays with Safety Components

**Goldenberg Snarecoil™ Bone Marrow Needle**
- Features the revolutionary Snarecoil™ design that allows for the specimen to be severed and secured in the needle lumen
- Longer specimen obtained
- Less specimen fragmentation
- Stylet features a trocar-tip design for easier penetration of the cortical layer of the bone
- Snare is deployed by moving lever from “Off” to “On” position
- “In and Out” procedure - no need to “rotate” the needle to sever the specimen

Argyle™ Turkel™ Safety Paracentesis Tray

**Argyle™ Turkel™ Safety Paracentesis Tray with Safety Components**

**Latex Free**

**Turkel™ Paracentesis Safety Needle**
- Blunt, multi-side holed, spring-loaded inner cannula extends beyond needle bevel; protects underlying organs from inadvertent penetration
- Color change indicator, located in the needle hub provides direct visualization of the position of the blunt cannula, as the needle moves through the abdominal wall and into the peritoneal space

**Paracentesis Catheter**
- Polyurethane, radiopaque catheter material provides strength, softness flexibility, and resistance to thrombosis
- Multiple side holes in distal catheter shaft increase surface area for drainage
- Depth marks on catheter shaft provide assessment of catheter location during procedure
- Tuohy-Borst adapter provides a way to reinsert the safety needle for multiple insertion capability

**Paracentesis Procedure Tray**
- Preassembled disposable tray saves procedural set-up time; assures availability of a complete, sterile tray
- Two-tiered tray design separates prep and procedure components; easy procedure planning
- Sequential arrangement of components reduces procedure time

**Sterile Contents**

Argyle™ Turkel™ Safety Pneumothorax Tray

**Argyle™ Turkel™ Safety Pneumothorax Tray with Safety Components**

**Safety Pneumothorax Needle**
- Blunt, multi-side holed, spring-loaded inner cannula extends beyond needle bevel; protects underlying tissue (lung) from further, inadvertent penetration
- One-way duck bill valve in needle hub housing allows air and fluid to escape from the needle yet prevents atmospheric air from entering into the pleural space to prevent accidental pneumothorax during procedure
- Color change indicator in needle hub housing provides direct visualization of the position of the cannula as the needle moves through the chest wall and into the pleural space

**Pneumothorax Catheter**
- Polyurethane catheter material provides strength, softness, flexibility and resistance to thrombosis
- Multiple side holes in distal catheter shaft increases surface area for drainage
- Depth marks on catheter shaft provide assessment of catheter location during procedure

**Pneumothorax Procedure Tray**
- Preassembled disposable tray saves procedural setup time; assures availability of a complete, sterile tray

Curity™ Thoracentesis Trays

Curity™ Thoracentesis Trays with Safety Components — Latex Free

- Aspirating needle is equipped with a unique depth clamp that adjusts easily to the desired level of insertion and then locks into place, reducing the risk of over-penetration of the needle into the chest cavity.
- Once assembled, the closed system allows pleural fluid to be aspirated, and collected with reduced risk of external contamination.
