LigaSure™ technology compared to traditional ligation techniques has been clinically shown to:

- Significantly reduce operative costs during colectomies when compared to staples and clips
- Significantly reduce operative blood loss during hysterectomies
- Significantly reduce operative time during hysterectomies
- Significantly reduce length of hospital stay

**LigaSure Advance™ 44 cm Instrument's combination of monopolar and vessel sealing provides:**

- Consistent Seals
- Cutting Independent of Sealing
- Multifunction
- Low Thermal Spread
- Extended Reach
