For more than 50 years, the surgical solutions that make up our Valleylab™ energy family have inspired confidence. Solutions like our LigaSure™ Maryland jaw device.

In a single device, it delivers:
- A one-step vessel sealer
- A dissector
- A grasper
- Cold scissors

Now, that reliable technology is better than ever because we’ve added a nonstick nano-coating to the jaws.

It’s part of our commitment to helping you overcome your clinical challenges so that — together — we can provide the best possible patient care.
ENHANCED DISSECTION.\textsuperscript{4,†}
INTUITIVE CONTROL.\textsuperscript{4,‡}
GREATER EFFICIENCY.\textsuperscript{2,§}

We engineered our multifunctional LigaSure™ Maryland jaw device to provide efficiency throughout the procedure.\textsuperscript{5,Ω} Now, we’ve taken that efficiency to the next level — by putting nonstick nano-coating on the jaws.\textsuperscript{2,§}

Multifunctional flexibility

With the LigaSure™ Maryland jaw device you get the benefits of:
• A one-step vessel sealer\textsuperscript{3}
• A Maryland dissector for enhanced blunt dissection\textsuperscript{4,‡}
• An atraumatic grasper to securely grasp tissue\textsuperscript{4,††}
• Cold scissors to leave the critical decision to cut in your hands\textsuperscript{3,5}

Multifunctional performance\textsuperscript{4}

The LigaSure™ Maryland jaw device delivers:
• Improved access compared to straight jaws\textsuperscript{4}
• Improved tip visualization compared to straight jaws\textsuperscript{11}
• A jaw designed to follow the curvature of the uterus or stomach\textsuperscript{11}
• Easy skeletonization of vessels\textsuperscript{11}
• A nonstick nano-coating for improved efficiency\textsuperscript{6}

A SMOOTHER, MORE EFFICIENT²,† PROCEDURE.

All the advantages of the LigaSure™ Maryland jaw device. Now made even better by nonstick nano-coating.

**Less sticking³⁺**

- 97% less than our legacy device
- 97% less than the EnSeal™ G2 5 mm device
- 97% less than the Voyant™ 5 mm Fusion

**More effective cleaning**

The LigaSure™ Maryland jaw device with nano-coating delivers³⁺:

- Fewer cleanings during the procedure than the legacy device
- Greater procedural efficiency than the legacy device because of less eschar buildup and fewer jaw cleanings
- Potentially fewer instrument exchanges due to fewer jaw cleanings needed

**Less eschar buildup²,Ω**

- 15% less than our legacy device

Standard reprocessing methods will degrade the nonstick coating and lead to an increase in sticking, eschar buildup, and cleanings.⁶

---

† Compared to the legacy device.
‡ Instances of tissue sticking to jaws measured over 110 seals per device.

Ω Eschar buildup assessed using optical imaging analysis after 60 seal and divide cycles.

⁶ Standard reprocessing methods will degrade the nonstick coating and lead to an increase in sticking, eschar buildup, and cleanings.
THREE LENGTHS FOR MULTIPLE PROCEDURES AND APPROACHES.³

The nano-coated LigaSure™ Maryland jaw device delivers the same excellent benefits in three different lengths:

- LF1944 — 44 cm
- LF1937 — 37 cm
- LF1923 — 23 cm

Made even better by the Valleylab™ FT10 energy platform

The LigaSure™ Maryland jaw portfolio works great when powered by the ForceTriad™ energy platform with 3.6 software and higher. For optimal performance, use it with the Valleylab™ FT10 energy platform.

The Valleylab™ FT10 energy platform makes LigaSure™ devices better than ever.⁷,⁸
What is LigaSure™ technology?
LigaSure™ vessel-sealing technology uses the body’s own collagen and elastin to create a permanent seal that can withstand three times normal systolic blood pressure. It’s been used in more than 19 million procedures worldwide and is supported by an ever-growing body of clinical evidence.

Our groundbreaking technology uses the body’s collagen and elastin to create a permanent seal.

What does it do?
With an average seal cycle of 1 to 4 seconds in most surgical situations, LigaSure™ technology can seal:

- Vessels up to and including 7 mm
- Lymphatics
- Tissue bundles

It also eliminates the guesswork — and minimizes thermal spread — by automatically discontinuing energy delivery when the seal cycle is complete.

†Based on data from 2001 through FY17.
I’m requesting the following instruments be stocked in our facility so that I have consistent access to them for my cases:

- LigaSure™ Maryland jaw 23 cm open sealer/divider (LF1923)
- LigaSure™ Maryland jaw 37 cm laparoscopic/sealer/divider (LF1937)
- LigaSure™ Maryland jaw 44 cm long laparoscopic/sealer/divider (LF1944)

**Implements procedural flow**

Compared to the legacy device, the nonstick coating on the LigaSure™ Maryland jaws:

- Reduces sticking\(^1\) and eschar buildup\(^2,\)
- Results in fewer cleanings\(^2,\)
- Makes cleaning more efficient\(^2,\)
- Enables greater procedural efficiency\(^2,\)

**Multifunctional flexibility**

LigaSure™ Maryland jaw devices:

- Securely andatraumatically grasp tissue\(^3,\)
- Provide enhanced blunt dissection\(^3,\)

**Proven technology**

LigaSure™ Maryland jaw devices deliver the reliable performance of LigaSure™ vessel-sealing technology, which has the highest burst pressure, fastest sealing time, and highest overall rating\(^4\) compared to Gyrus PKS™*, Harmonic ACE™*, and Enseal™*

I’m confident in using a technology that has been used in more than 19 million cases\(^5\) and is backed by a significant body of evidence-based research.

Thank you for reviewing this information. Please feel free to contact me if you have any questions.

Sincerely,

Mr. Celso Duran
Senior Specialist, Regulatory Affairs
5920 Longbow Drive
Boulder, Colorado 80301

Re: K170869
  Trade/Device Name: LigaSure Maryland Jaw Sealer/Divider One-step Sealing, Nano-coated
  Regulation Number: 21 CFR 878.4400
  Regulation Name: Electrosurgical cutting and coagulation device and accessories
  Regulatory Class: Class II
  Product Code: GEI
  Dated: March 22, 2017
  Received: March 23, 2017

Dear Mr. Duran:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply
Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Division of Industry and Consumer Education at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH's Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Industry and Consumer Education at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely,

For Binita S. Ashar, M.D., M.B.A., F.A.C.S.
