**IMPROVED TRACKING.**
Modified tip component for a more uniform transmission of tracking force.

**INCREASED LOADING RELIABILITY**
Redesigned capsule guide tube fits paddles into loading pockets helping to simplify loading.

**Simplified Product Portfolio**
Compatibility with current EnVevo delivery and loading systems.

The Medtronic CoreValve™ Evolut® R and CoreValve™ Evolut® PRO systems are indicated for use in patients with symptomatic aortic valve disease due to failure (stenosed, insufficient, or combined) of a surgical bioprosthetic aortic valve who are judged by a heart team, including a cardiac surgeon, to be at intermediate or greater risk for open surgical therapy (i.e., predicted risk of surgical mortality ≥ 3% at 30 days, based on the Society of Thoracic Surgeons [STS] risk score and other clinical comorbidities unmeasured by the STS risk calculator). The CoreValve Evolut R or CoreValve Evolut PRO transcatheter aortic valve may include, but are not limited to, the following: death; myocardial infarction, cardiac arrest, cardiogenic shock, cardiac tamponade; coronary occlusion, obstruction, or vessel spasm (including acute coronary closure); cardiovascular injury (including rupture, perforation, tissue erosion, or dissection of vessels, ascending aorta trauma, ventricle, myocardium, or valvular structures that may require intervention); emergent surgical or transcatheter intervention (for example, coronary angioplasty or elective balloon aortic valvuloplasty); stroke or systemic embolization; endocarditis; severe left ventricular dysfunction; life-threatening arrhythmia; death; mechanical failure; or device embolization. The potential risks and contraindications associated with the implantation of the CoreValve Evolut R or CoreValve Evolut PRO transcatheter aortic valve may include, but are not limited to, the following: the patient's anatomy, poor clinical condition, or other medical conditions. Please reference the CoreValve Evolut R or CoreValve Evolut PRO Instructions for Use for more information regarding indications, warnings, precautions, and potential adverse events.
