WHAT ARE HEALTH PLAN NETWORKS?

SEEQ™
Mobile Cardiac Telemetry System

A network is a group of providers that a health plan will contract with directly to provide medical services for their members. When we use the term provider, we mean any person or entity that provides medical services: physicians, laboratories, hospitals, and companies like Medtronic Monitoring Inc. Typically, the health plan will negotiate competitive rates with their network providers as a cost saving measure. Providers that have contracted directly with a health plan are considered **in-network.**

Providers that have not negotiated a rate, signed a contract, and gone through a plan's credentialing process are considered **out-of-network.**

Patient benefits can vary based on how their plan is designed. Plan designs can have different deductible amounts, monthly premiums, co-pays, co-insurance, and in-and/or out-of-network benefits. **If a patient DOES have out-of-network benefits, meaning their plan will cover some of the cost to see an out-of-network provider, the patient share of cost is typically higher than if they went to an in-network-provider.**

HMO VS. PPO PLANS

SEEQ™
Mobile Cardiac
Telemetry System

A PPO plan, or **Preferred Provider Organization Plan** is a managed care organization of health providers who contract with an insurer or third-party administrator (TPA) to provide health insurance coverage to policy holders represented by the insurer or TPA. Policy holders receive substantial discounts from health care providers who are partnered with the PPO. If policy holders use a physician outside the PPO plan, they typically pay more for the medical care. This is often referred to as an out of network or a non-participating provider with a particular health plan. PPO plans typically have higher monthly premiums and patients with PPO plans can usually visit any doctor (ie, an electrophysiologist) without getting a referral.

A **HMO plan or Health Maintenance Organization plan** usually limit coverage to care from providers who work for or contract with the plan directly. An HMO generally won't cover or has limited coverage for out-of-network care except in an emergency. Monthly premiums tend to be lower for HMO plans, but it's important to keep in mind that these patients have a narrow network of providers to choose from. Patients with an HMO plan usually have an assigned primary care doctor and typically need a referral to see specialists.

Patients with PPO plans have the opportunity to see a wider network of providers while maintaining some form of coverage, whereas patients with HMO plans are pretty much limited to a set network of providers. This is how health plans are able to lower the premium cost to beneficiaries as they negotiate very aggressive rates for service with the providers in the HMO networks.

Brief Statement
Medtronic SEEQ™ Mobile Cardiac Telemetry (MCT) System

Indications: The Medtronic SEEQ Mobile Cardiac Telemetry (MCT) System is intended to continuously measure, record, and periodically transmit physiological data. The System is indicated for those patients who require monitoring for the detection of non-lethal cardiac arrhythmias such as, but not limited to, supraventricular tachycardias (e.g., atrial fibrillation, atrial flutter, paroxysmal SVTs), ventricular ectopy, bradyarrhythmias, and conduction disorders. The SEEQ MCT System monitors, derives, and displays: ECG, Heart Rate.

Contraindications

- Patients with known allergies or hypersensitivities to adhesives or hydrogel
- Patients with potentially life-threatening arrhythmias, or who require inpatient/hospital monitoring

Warnings and Precautions

- Do not reapply the Wearable Sensor (it is meant for one-time use).
- For a complete list of precautions, please refer to the Instructions for Use document.

See the device manual for detailed information regarding the indications, contraindications, warnings, precautions, and potential complications/adverse events. For further information, please call Medtronic at 1-800-328-2518 and/or consult Medtronic's website at www.medtronic.com.

Caution: Federal law (USA) restricts these devices to sale by or on the order of a physician.

The SEEQ™ MCT System and the Medtronic Monitoring Center are provided by Medtronic Monitoring Inc., a wholly owned subsidiary of Medtronic.
