Please join us for The 2014 Pelvic Floor Forum on January 10-11 at the Omni Mandalay Hotel at Las Colinas in Dallas, Texas.

A message from Roger R. Dmochowski, MD, Program Chair:

I am honored to serve as Chair for The 2014 Pelvic Floor Forum, a program at which clinical experts and thought leaders in the field of pelvic floor disorders will come together to provide updates on clinical care and supporting evidence for the use of Sacral Neuromodulation (SNM) – as delivered by the InterStim System – to treat urinary incontinence, urinary urgency-frequency, non-obstructive urinary retention, or chronic fecal incontinence. Both overactive bladder and fecal incontinence diseases will be discussed in separate tracks.

Other topics:

- Discussion of the latest clinical evidence and practice guidelines
- Implant techniques and the best use of SNM therapy
- Strategies for patient selection and management
- Best practices for advancing SNM therapy and developing a referral network

Keynote Address: Creating the Ultimate Patient Experience

- Paul Spiegelman, Founder, The Beryl Institute

The format will be highly interactive with small breakout sessions conducted by thought leaders. Please don't miss this important opportunity to share your expertise and network with colleagues.

Sincerely,

Roger R. Dmochowski, MD, Program Chair
Professor, Departments of Urology and Obstetrics and Gynecology
Vanderbilt University
Nashville, Tennessee

Agenda

Friday, January 10, 2014
Please plan to arrive no later than 2:00 pm

3:00 - 5:00 pm  Overactive Bladder Track  Fecal Incontinence Track
### Welcome and Meeting Objectives
- Guideline Update
- Clinical Data Review
- Board Certification Update

### Interactive Workshops
- Advancing Your Practice and Referral Development
- Improving the Patient Experience
- Best Practices for Implant Techniques
- Future Trends in Care Delivery

### Welcome Reception and Dinner
Welcome Reception and Dinner with Remarks from Tom Tefft, President, Medtronic Neuromodulation and Roger R. Dmochowski, MD, Program Chair.

### Saturday, January 11, 2014

*Please note: Attendees must be able to participate for the entire duration of the meeting.*

Attendees will rotate through four Interactive Workshops:

- **Advancing Your Practice and Referral Development**
  Strategies for creating a robust and sustainable network to grow your business

- **Improving the Patient Experience**
  Patient selection and management - moving your patient through the care continuum

- **Best Practices for Implant Techniques**
  Essential techniques that impact successful implant

- **Future Trends in Care Delivery**
  Multi-disciplinary discussion of current trends in practice models and patient care

Keynote Speaker

Paul Spiegelman
Founder, The Beryl Institute
Bedford, Texas

Additional Resources

Keynote Speaker Paul Spiegelman, Founder of The Beryl Institute will present "Creating the Ultimate Patient Experience." This session will center on the transformation in leadership today, from one focused on financial metrics, to one focused on purpose and meaning. Attendees will learn tools for living the mission statement, recruiting great talent, supporting high-potential employees, engaging stakeholders and measuring and monitoring success.

Dr William de Groat will present on the Mechanism of Action for Sacral Neuromodulation leveraging a recent, extensive clinical data review. See a preview of the science.

<th>Important Safety Information</th>
</tr>
</thead>
</table>

**InterStim® Therapy for Urinary Control** is indicated for the treatment of urinary retention and the symptoms of overactive bladder, including urinary urge incontinence and significant symptoms of urgency-frequency alone or in combination, in patients who have failed or could not tolerate more conservative treatments.

The following Warning applies only to InterStim Therapy for Urinary Control:

**Warning:** This therapy is not intended for patients with mechanical obstruction such as benign prostatic hypertrophy, cancer, or urethral structure.

**InterStim® Therapy for Bowel Control** is indicated for the treatment of chronic fecal incontinence in patients who have failed or are not candidates for more conservative treatments.

**Contraindications for Urinary Control and for Bowel Control:**
Diathermy. Patients who have not demonstrated an appropriate response to test stimulation or are unable to operate the neurostimulator.

**Precautions/Adverse Events:**

**For Urinary Control:** Safety and effectiveness have not been established for bilateral stimulation; pregnancy, unborn fetus, and delivery; pediatric use under the age of 16; or for patients with neurological disease origins such as multiple sclerosis.

**For Bowel Control:** Safety and effectiveness have not been established for bilateral stimulation; pregnancy, unborn fetus, and delivery; pediatric use under the age of 18; or for patients with progressive, systemic neurological diseases.

**For Urinary Control and for Bowel Control:** The system may be affected by or adversely affect cardiac devices, electrocautery, defibrillators, ultrasonic equipment, radiation therapy, MRI, theft detectors/screening devices. Adverse events include pain at the implant sites, new pain, lead migration, infection, technical or device problems, adverse change in bowel or voiding function, and undesirable stimulation or sensations, including jolting or shock sensations. For full prescribing information, please call Medtronic at 1-800-328-0810 and/or consult Medtronic’s website at www.medtronic.com. Product technical manual must be reviewed prior to use for detailed disclosure.

USA Rx Only. Rev 0409

Please note: This event is for invited clinicians only, who have a practice or specialty that relates to an approved use of the Medtronic product being discussed. Your participation in this event, and any value transferred to you during the event will be disclosed in accordance with applicable Federal and State Law.
