MEDTRONIC

The following lists Medtronic implantable cardiac devices supported by programmer import on the Paceart System Get Connected II Edition released February, 2008. NOTE: Information transfer is dependent upon programmer export and Paceart System supported fields. Earlier releases of the Paceart System may not support all the devices listed. Not all products may be available outside the United States. Contact your Medtronic representative for additional information.

If a device is not supported, please contact Medtronic to ask that it be included in future Paceart releases.

New Implantable Cardiac Devices Included in the Paceart System Get Connected II Edition Release

No new devices were reported to Paceart by Medtronic at the time of release.

VITATRON

The following lists Vitatron implantable cardiac devices supported by programmer import on the Paceart System Get Connected II Edition released February, 2008. NOTE: Information transfer is dependent upon programmer export and Paceart System supported fields. Earlier releases of the Paceart System may not support all the devices listed. Not all products may be available outside the United States. Contact your Medtronic/Vitatron representative for additional information.

If a device is not supported, please contact Vitatron to ask that it be included in future Paceart releases.

New Implantable Cardiac Devices Included in the Paceart System Get Connected II Edition Release

No new devices were reported to Paceart by Vitatron at the time of release.

Brief Statement

For further information regarding **Paceart**[®], please call Medtronic at 1 (800) 722-3278 and/or consult Medtronic's website at www.paceart.com.

The Medtronic/Vitatron CareLink[®] Programmer System is comprised of prescription devices indicated for use in the interrogation and programming of implantable medical devices. Prior to use, refer to the Programmer Reference Guide as well as the appropriate programmer software and implantable device technical manuals for more information related to specific implantable device models. Programming should be attempted only by appropriately trained personnel after careful study of the technical manual for the implantable device and after careful determination of appropriate parameter values based on the patient's condition and pacing system used. The CareLink[™] Programmer must be used only for programming implantable devices manufactured by Medtronic or Vitatron.

The Medtronic CareLink Monitor is indicated for use in the transfer of patient data from some Medtronic implantable cardiac devices based on physician instructions and as described in the product manual. This product is not a substitute for appropriate medical attention in the event of an emergency and should only be used as directed by a physician. The CareLink Network is currently available in the continental United States, Alaska, and Hawaii.

See the device manuals for detailed information regarding the instructions for use, indications, contraindications, warnings, precautions, and/or potential adverse events. For further information, please call Medtronic at 1 (800) 328-2518 and/or consult Medtronic's website at www.medtronic.com.

Caution: Federal law (USA) restricts these devices to sale by or on the order of a physician.
