# Make a Difference

LDRP SUMMER ASSOCIATE PROGRAM

Imagine an internship where you can help launch a new product to relieve a chronic condition, expand a therapy into a global market to reach new patients, or identify ways to improve operational efficiency. At Medtronic, you can.

Our LDRP Summer Associate Program is designed specifically for high-potential, high-performing people like you. Every internship features challenging assignments that enable you to dig in, test your skills, and quickly make meaningful contributions to the world's leading medical technology company.

## How does it work?

We offer 10- to 12-week internships, typically between May and September. The program is designed to give our associates exposure to and a better understanding of our core businesses, technologies, and culture. In addition to your internship assignment, you'll have opportunities to network with peers, managers, and our executive leadership team; participate in volunteer events; and experience our dynamic culture through social events.

## Which functional areas will I work in?

As part of the Summer Associate Program, you can have cross-functional assignments in **Marketing, Business Development** and **Strategy**, depending on your interests, background/skillset and our business needs.

## Where will I work?

The majority of our internship opportunities are in Minneapolis, Minnesota — our World Headquarters. This gives associates exposure to the executive leadership team, opportunities to learn about the company and culture, and provides a sense of community with other interns. We may also offer internships at other major locations:

### Minneapolis, Minnesota

Cardiac Rhythm Disease Management  
CardioVascular  
Neuromodulation  
World Headquarters

### Jacksonville, Florida

ENT

### Northridge, California

Diabetes

### Santa Rosa, California

CardioVascular

### Louisville, Colorado

Navigation Technology

### Memphis, Tennessee

Spinal and Biologics

## Am I qualified for the program?

We're looking for bold thinkers to help us push the boundaries of medical technology. Here are the minimum requirements:

- Currently pursuing an MBA
- 3 or more years of work experience
- Excellent communication, leadership, and strategic-thinking skills
- Bright, flexible, and results-oriented
- Highly mobile and willing to pursue geographic opportunities
- Legally authorized to work in the United States on a full-time basis and must not require sponsorship in the future for an employment visa

## What happens after my internship?

High-performing interns are considered for full-time offers to join our **Leadership Development Rotation Program**. The program provides high-potential employees strategic experiences across businesses and geographies, as well as visibility throughout the organization.

## Why choose Medtronic?

- Your day-to-day work and decisions are based on alleviating pain, restoring health, and extending life—for more than 10 million people a year.
- You'll gain unprecedented opportunities by working at the world's largest medical technology company.
- You'll be joining a company firmly committed to global health, science education and community nonprofit organizations – offering numerous employee volunteer and leadership opportunities.
