CLEARER VISUALIZATION. SIMPLIFIED DISSECTION.¹

ProdiGI™ traction wire.
Bringing confidence to Endoscopic Submucosal Dissection (ESD)
The ProdiGI™ traction wire has been purpose-built for ease-of-use — to deliver uninterrupted visualization of the dissection plane — bringing clarity and confidence to your ESD procedures. It allows you to hold tissue during dissection procedures and expose the dissection plane.

**Specifications**

<table>
<thead>

**ESD Simplified**

In an ex-vivo study comparing against conventional ESD, ProdiGI™ traction wire:
- Significantly improved endoscopists’ visualization of the submucosal space
- Exceeded physician expectations for ease of placement
- Significantly improved physician satisfaction with respect to time and traction effect
- Successfully been used in esophageal, gastric and colorectal ESD procedures

**Indicated Use**

The Medtronic ProdiGI™ Traction Wire is indicated to grasp tissue within the gastrointestinal tract during an Endoscopic Submucosal Dissection procedure.

**Complications**

Potential complications include:
- Irritation or injury to the mucosa
- Device fragments in patient
- Tissue damage
- Allergic reaction
- Fever
- Mucosal laceration
- Minor acute bleeding
- Major bleeding
- Transfusion secondary to major bleeding
- Infection
- Perforation and secondary complications related to perforation
- Surgery or secondary intervention to correct perforation
- Aspiration
- Peritonitis
- Tissue seeding
- Death
- Additional complications associated with an endoscopic submucosa dissection procedure
