V-Loc™
Wound Closure Device
Product Catalogue

The V-Loc™ wound closure device is a revolutionary technology that closes wounds securely without the need to tie knots. This guide showcases the available sizes with all applicable needles.

V-Loc™ Wound Closure Device

The Secure Advantage V-Loc™ Device

The V-Loc™ device provides greater wound closure strength compared with the Stratafix™ Spiral.^{3,4} The unique dual-angle cut and barbing pattern of the V-Loc™ device creates the barbing technology, which is backed by eight years of clinical experience.

Barb Design

V-Loc™ device utilizes a dual-angle cut that creates a strong anchoring barb⁴ while maintaining the strand's integrity.

V-Loc™ Device

Dual-Angle Cut

Lower-cut angle produces barbs with strong anchoring force and the shallow cut-depth preserves the integrity of the strand's strength

Stratafix™ Spiral

Single-Angle Cut

High-cut angle produces flimsy barbs and the deeper cut-depth results in the compromise of the strand's strength

V-Loc™ 90

Absorbable Wound Closure Device

V-Loc™ Wound Closure Device

	V-Loc™ 90 Device	V-Loc™ 180 Device	V-Loc™ PBT Non-Absorbable Device
Tensile Strength	7 days, 90%; 14 days, 75%	7 days, 80%; 14 days, 75%; 21 days, 65%	Permanent
Absorption Profile	90-110 days	180 days	Permanent
Procedural Applications	Soft tissue approximation where support is required consistent with the absorption profile	Soft tissue approximation where support is required consistent with the absorption profile	Soft tissue approximation
Color	Undyed, violet 	Clear, green 	Blue 
Composition	Glycolide, dioxanone and trimethylene carbonate	Copolymer of glycolic acid and trimethylene carbonate	Polybutester
Indications	V-Loc™ 90 and V-Loc™ 180 absorbable wound closure devices are indicated for soft tissue approximation where use of an absorbable suture is appropriate.		V-Loc™ PBT non-absorbable wound closure devices are indicated for soft tissue approximation.
