

# FIVE-DAY ESSENTIAL SERVICE SEMINAR

## Puritan Bennett™ 840 Ventilator

### Service training expertise

Your Puritan Bennett™ 840 ventilators are a valuable investment, deserving of the best in preventive maintenance and protection. And our Service Seminars team can ensure your team is prepared to maintain and care for your Puritan Bennett™ ventilators.

Our service seminars team trains biomedical service technicians and clinical engineers on the essentials of servicing, testing, and repairing the Puritan Bennett™ 840 ventilator. Together, we can support the peak performance of your devices.

### Curriculum

Our five-day essential service seminar focuses on:

- Proper ventilator setup and functions
  - How to correctly operate the ventilator in normal operation
- Theory of operations
  - How to properly identify, handle, test, and troubleshoot ventilator pneumatic and electronic subsystems and components
- Self-test diagnostics
  - When, why, and how to run and troubleshoot short self-test, extended self-test, power-on self-test, and background diagnostics
- Periodic and preventive maintenance
  - How to properly maintain the ventilator for optimum performance
- Performance verification testing
  - How to test the ventilator performance according to manufacturer's recommendations

### Location

All ventilator service seminars are held at the Medtronic Service Seminars Training Center in coastal North County San Diego, California.

### Registration

Seminar registration is on a first-come, first-served basis. To encourage interaction, class size is limited. For information including seminar pricing and additional registration details, please contact your Medtronic Ventilation field service engineer, account executive, or our Service Seminars team directly at [800-255-6774](tel:800-255-6774), [opt. 3](tel:800-255-6774), or at [RS.ServiceSeminars@medtronic.com](mailto:RS.ServiceSeminars@medtronic.com).
