

# TWO-DAY ADVANCED SERVICE SEMINAR

## Puritan Bennett™ 840 Ventilator

### Service training expertise

Your Puritan Bennett™ 840 ventilators are a valuable investment, deserving of the best in preventive maintenance and protection. And our Service Seminars team can ensure your team is prepared to maintain and care for your Puritan Bennett™ ventilators.

Our service seminars team provides advanced training for biomedical service technicians and clinical engineers on servicing, testing, and repairing the Puritan Bennett™ 840 ventilator. Together, we can support the peak performance of your devices.

### Curriculum

The two-day advanced service seminar is designed for service providers who have attended the basic seminar and want a deeper understanding to efficiently diagnose, service, and repair the Puritan Bennett™ 840 ventilator.

The service seminar includes an intensive review of:

- Pneumatic system operations
- Electronic system operations
- Software system operations

It also covers:

- Analyzing diagnostic codes and logs
- Enhancing interpretive diagnostic skills
- Troubleshooting

### Location

All ventilator service seminars are held at the Medtronic Service Seminars Training Center in coastal North County San Diego, California.

### Registration

Seminar registration is on a first-come, first-served basis. To encourage interaction, class size is limited. For information including seminar pricing and additional registration details, please contact your Medtronic Ventilation field service engineer, account executive, or our Service Seminars team directly at **800-255-6774, opt. 3, or at [RS.ServiceSeminars@medtronic.com](mailto:RS.ServiceSeminars@medtronic.com)**.
