Our Puritan Bennett™ 980 ventilator includes an integrated nebulizer option. The integrated nebulizer option is designed to power and control the Aerogen™ nebulizer to deliver physician prescribed solutions to patients.

**CONNECT THE NEBULIZER**

1. Open the connector panel door.
2. Firmly insert the sensor cable into the connector port labeled Aerogen Nebulizer on the ventilator.
3. Connect the other end to the Aerogen™ Solo or Pro nebulizer electrical connection port.

**START AND STOP A TIMED NEBULIZATION CYCLE**

1. Add medication to the Aerogen™ Solo or Pro nebulizer.
2. Touch the Nebulizer icon on the GUI.
3. Touch the Solo or Pro button.
4. Touch the Time button and turn the knob to the desired nebulization time.
5. Touch START.
6. Allow the nebulizer to deliver the medication for the allotted time.
7. To extend nebulization time by 15 minutes, touch the Extend button.
8. Touch the Stop button to stop the nebulizer.

**ASSEMBLE THE NEBULIZER**

1. Fit the Aerogen™ Solo or Pro nebulizer firmly into the appropriate T-piece adapter.
   a. Adult T-adapter
   b. Pediatric T-adapter
   c. Neonatal T-adapter with adapters
TO START AND TO STOP A CONTINUOUS NEBULIZATION CYCLE

1. Prime the syringe and connect it to the nebulizer.
2. Touch the **Nebulizer** icon on the GUI.
3. Touch the **Solo** button.
4. Touch the **Continuous Nebulization (∞)** button.
5. Touch the **START** button.
6. Allow the nebulizer to deliver the medication.
7. Touch the **Stop** button to stop the nebulizer.

**Note:** The nebulizer does not automatically shut off. When the medication reservoir is empty, manually stop the nebulizer by touching the **Stop** button.
