

# RELEVANT TRAINING FOR MAXIMUM EFFICIENCY.

Join us at our  
Valleylab™ energy  
platforms service seminar.

## CURRICULUM

Our service seminars team teaches biomedical equipment technicians (BMETs) and clinical engineers (CEs) how to set up, operate, calibrate, and troubleshoot our Valleylab™ energy platforms.

Using manufacturer-specific information and guidelines, we make sure biomedical professionals can perform preventive maintenance and repair equipment efficiently and effectively.

Through extensive hands-on workshops and demonstrations, participants will learn to:

- **Disassemble equipment**
- **Remove and replace parts**
- **Perform calibration procedures**
- **Confirm output parameters**

Participants should have a background in biomedical equipment technology or electronic engineering technology. Previous experience with ventilators or electrosurgical equipment is beneficial.

## COMPLETION CRITERIA

Successful course completion will be determined through lab exercises and written tests. Participants will receive a certificate of completion if they attend the entire course and fulfill the competency requirements.

## LOCATION & REGISTRATION

All service seminars are held at the Medtronic Service Seminars Training Center in Carlsbad, California.

Registration is on a first-come, first-served basis. Class size is limited.

For information — including seminar pricing and additional registration details — please visit us at **Medtronic.com/ServiceSeminars** or contact the Medtronic Service Seminars team at 800-255-6774 (option 3) or **RS.ServiceSeminars@medtronic.com**.
