ENHANCED SECURITY, STABILITY & VERSATILITY. ¹, ², †

So you can move through cases smoothly

Endo Clip™ III
5 mm Clip Applier

Clip Logic™ Technology
Designed to ensure proper clip feeding and formation, Clip Logic™ technology²:
- Simultaneously pushes the jaws apart and pulls them into alignment
- Protects the clip from external forces caused by tissue pressing against the jaws²
- Allows for blunt dissection of tissue without compromising clip formation²

LCD digital counter
Displays the number of clips remaining and facilitates easy viewing during laparoscopic cases.

Safety interlock feature
Prevents the handle from being squeezed and the empty jaw from closing.

¹Compared to our legacy device, referencing clip security and jaw stability.
Endo Clip™ III clip applier offers a 9.1 mm clip — the longest available in a 5 mm device.

**Target structures with precision and strength**

*Our U-shaped clip features:*
- A back span angle of 115 degrees which allows target structures all the way to the back of the clip during approximation.
- A clip closure that is initiated at the distal tips, which locks in tissue and forces it to the apex of the clip.
- Titanium clip strength that provides a tight fit on target structures.
