WHEN IT COMES TO SUTURING, EXPERIENCE MATTERS.

Endo Stitch™ Suturing Device

Clinically proven technology that's designed to make suturing easier, faster, and save you money. Just a few of the reasons our Endo Stitch™ device is the most frequently used suturing device in the world.
Suturing during laparoscopic procedures used to be overly complex — then we came up with a faster, easier, less expensive solution\textsuperscript{1-6}

Our Endo Stitch\textsuperscript{™} suturing device has been used in more than two million surgical cases.\textsuperscript{7}

- A slim 10 mm profile allows for minimal fascial defect
- Dual-purpose toggle transfers the needle back and forth in the jaw — and allows the device to backtrack for repositioning of the needle when necessary
- The Endo Stitch\textsuperscript{™} device is disposable — that means there’s never a need to clean or repair it
- Ergonomic in-line grip for one-handed use
- Straight 9 mm needle may allow for more tissue capture than curved needles
- A versatile jaw that:
  - Has a depth of 19 mm
  - Opens to 19 mm
  - Functions as a knot pusher
V-Loc™ barbed sutures
The Endo Stitch™ device is a perfect partner with V-Loc™ barbed sutures. Our revolutionary V-Loc™ sutures make knot tying unnecessary. That means you can save even more time suturing — without sacrificing strength or security.¹

The Endo Stitch™ device is a great partner with our V-Loc™ barbed sutures

¹Based on tests using a porcine model.
## ORDERING CODES
