

# LET'S MAXIMIZE YOUR VENTILATOR INVESTMENT, **TOGETHER.**

Join us for a three-day service seminar  
for the Newport™ HT70 ventilator

## Service training expertise

Your Newport™ HT70 series ventilators are a valuable investment. And the Medtronic Service Seminars team has the expertise to ensure your team is prepared to care for them.

Our three-day seminar gives biomedical service technicians and clinical engineers training about periodic and preventive maintenance procedures for Newport™ HT70 series ventilators. To keep them working at peak performance — for you and your patients.

## Curriculum

Our ventilation service seminar focuses on:

- **Proper ventilator setup and functions:** How to correctly operate the ventilator in normal operation.
- **Theory of operations:** How to properly identify, handle, and test ventilator pneumatic and electronic subsystems and components.
- **Periodic and preventive maintenance:** How to properly maintain the ventilator for optimum performance including calibrations.
- **Performance verification testing:** How to test the ventilator performance according to manufacturer's recommendations.

## Location

All service seminars are held at the Medtronic Service Seminars Training Center in coastal North County San Diego, California.

## Registration

Registration is on a first-come, first-served basis. And class size is limited.

For information — including seminar pricing and additional registration details — please contact your Medtronic Ventilation Field Service Engineer or Account Executive, call 800-255-6774, option 3, or email [RS.ServiceSeminars@medtronic.com](mailto:RS.ServiceSeminars@medtronic.com).
