LigaSure™ Curved Jaw, Open Sealer/Divider

Move beyond mechanical ligation to a higher level of performance in open surgery. Let’s put the most innovative tools in your hands. And let’s put patients first.

The LigaSure™ curved jaw device provides the three essential elements you need: grasping, sealing and cutting — and we have not stopped there. It brings proven technology to a reposable device that is both easy to use and cost effective.

Let’s work together and redefine the standard of care with LigaSure™ curved jaw device in open surgery.

**ESSENTIAL ENERGY IN YOUR HANDS.**

**INTEGRATED CUTTING BLADE**
- Control to cut only when you want to
- Leads to reduced instrument exchanges and thus potential time savings

**TWO-PART REPOSABLE INSTRUMENT**
- Reusable clamp and disposable single-use electrode minimize waste compared with single-use devices
- Ergonomically designed to fit a broad range of hand sizes

**INLINE ACTIVATION BUTTON**
- The first click indicates the end of the grasp zone and a second click indicates energy activation.
- The same hand can activate and hold the device in different positions.

**HEMOSTAT-STYLE REUSABLE CLAMP**
- Familiar grip makes the instrument easy to use
- Clamp allows for excellent and precise control

**DISPOSABLE ELECTRODE**
- Provides sealing independent of cutting and slides easily into place
ESSENTIAL ENERGY IN YOUR HANDS.

The LigaSure™ curved jaw, open device is compatible with the Valleylab™ LS10 generator, Valleylab™ FT 10 energy platform and ForceTriad™ energy platform.

Proven Patient Outcomes
- LigaSure™ technology provides control, confidence and consistent vessel sealing.
- LigaSure™ technology is supported by more than 1,000 peer-reviewed clinical studies, and has been used in more than 10 million procedures worldwide.
- LigaSure™ technology has been shown to significantly reduce post-op pain, length of hospital stay and blood loss compared to alternative ligation methods.

Cost-Effective
- LigaSure™ technology helps manage costs by significantly reducing procedure time and patients' hospital stay.
- Features a reusable clamp along with a disposable single-use electrode, to minimize waste compared with single-use devices.

Easy-to-Use
- The clamp-like design feels familiar in your hand. It is intuitive for surgeons without previous LigaSure™ experience and allows for excellent control.
- Combining the essential elements of surgery: grasping, sealing and cutting the exchange of instruments is minimized as compared to mechanical ligation.
