Evolut™ PRO+
Transcatheter Aortic Valve System

Medtronic
Further, Together
From a design built on a proven platform, the EVOLUT™ PRO+ system provides the performance and outcomes you need to help patients live life to the fullest.

**THE EVOLUT™ PRO+ TAVI SYSTEM ADVANTAGE**

- **HEMODYNAMIC PERFORMANCE** for exceptional patient outcomes

- **ADVANCED SEALING** for all valve sizes and across the broadest self-expanding annular range

- **LOW DELIVERY PROFILE** for access down to 5.0 mm vessels with the 23–29 mm valves
EVOLUT™ IS DESIGNED TO DELIVER

PERFORMANCE

The Evolut™ TAVI’s supra-annular, self-expanding valve design delivers exceptional hemodynamics and is the only TAVI device to demonstrate hemodynamic superiority in a low-risk clinical trial vs. SAVR.2

**LARGER EOAs LOWER GRADIENTS**

Evolut™ TAVI has demonstrated large effective orifice areas (EOAs), thereby:

- Lowering risk of severe patient-prosthesis mismatch (PPM) and subsequently reducing risk of mortality and heart failure rehospitalizations
- Promoting increased blood flow and minimizing PPM, allowing patients to maintain a higher exercise capacity, helping them return to an active life
- Suggesting a durable platform given Evolut™ TAVI is built on the CoreValve™ supra-annular, self-expanding platform, which has consistently sustained large EOAs and low mean gradients over time

Values used in the Evolut™ Low Risk Trial included CoreValve™, Evolut™ R, and Evolut™ PRO valves.

**Superior EOAs at 1 year**

LEADERSHIP IN VALVE DESIGN

Advanced Sealing across the Platform

The external tissue wrap on the Evolut™ PRO valves has shown excellent PVL performance. With the addition of the wrap to the 34 mm PRO+ valve, similar results can be expected — offering advanced sealing across the platform.

Total Aortic Regurgitation

Real-world commercial experience from the STS/ACC TVT Registry™ demonstrates excellent PVL performance.

The views or opinions presented in this document are solely those of Medtronic and do not represent those of the American College of Cardiology, The Society of Thoracic Surgeons, or the STS/ACC TVT Registry™.

Broadening Access with an Expanded Platform and Expanded Indication

- With a reduced delivery profile for 23-29 mm valves, the Evolut™ PRO+ System is indicated to treat patients with vessels as small as 5.0 mm.
- With the ability to treat the broadest annulus range† of any commercially available self-expanding TAVI system, Evolut™ PRO+ valves can treat annulus ranges from 18 mm to 30 mm.
- The Evolut™ PRO+ system is approved for all symptomatic severe aortic stenosis patients over ≥ 70 years of age or with a LVEF > 30%.

† Broadest annulus range based on CT derived diameters for self-expanding valves.
The Evolut™ PRO+ System treats the widest annulus range of any commercially available self-expanding TAVI system.
