NASAL AND SINUS ENDOSCOPY PROCEDURES

COMMONLY BILLED CODES

EFFECTIVE JANUARY 2018

Medtronic

Medtronic provides this information for your convenience only. It does not constitute legal advice or a recommendation regarding clinical practice. Information provided is gathered from third-party sources and is subject to change without notice due to frequently changing laws, rules and regulations. Medtronic makes no guarantee that the use of this information will prevent differences of opinion or disputes with Medicare or other payers as to the correct form of billing or the amount that will be paid to providers of service. Please contact your Medicare contractor, other payers, reimbursement specialists and/or legal counsel for interpretation of coding, coverage and payment policies. This document provides assistance for FDA approved or cleared indications. Where reimbursement is sought for use of a product that may be inconsistent with, or not expressly specified in, the FDA cleared or approved labeling (e.g. instructions for use, operator's manual or package insert), consult with your billing advisors or payers on handling such billing issues. Some payers may have policies that make it inappropriate to submit claims for such items or related service.

The following information is calculated per the footnotes included and does not take into effect Medicare payment reductions resulting from sequestration associated with the Budget Control Act of 2011. Sequestration reductions went into effect on April 1, 2013.

FOR QUESTIONS PLEASE CONTACT US AT **ENT.US.REIMBURSEMENT@MEDTRONIC.COM**

ICD-10-CM[1] Diagnosis Codes

Diagnosis codes are used by both physicians and hospitals to document the indication for the procedure. Because symptoms codes are generally not acceptable as the principal diagnosis, the principal diagnosis is coded to the underlying condition as shown.

Acute Recurrent Sinusitis	**J01.01**	Acute Recurrent Maxillary Sinusitis
	J01.11	Acute Recurrent Frontal Sinusitis
	J01.21	Acute Recurrent Ethmoidal Sinusitis
	J01.31	Acute Recurrent Sphenoidal Sinusitis
	J01.41	Acute Recurrent Pansinusitis
	J01.81	Other Acute Recurrent Sinusitis
	J01.91	Acute Recurrent Sinusitis, Unspecified
Chronic Sinusitis	**J32.0**	Chronic Maxillary Sinusitis
	J32.1	Chronic Frontal Sinusitis
	J32.2	Chronic Ethmoidal Sinusitis
	J32.3	Chronic Sphenoidal Sinusitis
	J32.4	Chronic Pansinusitis
	J32.8	Other Chronic Sinusitis
	J32.9	Chronic Sinusitis, Unspecified
Nasal and Septal Disorders	**J34.2**	Deviated Nasal Septum (acquired)
	J34.3	Hypertrophy of Nasal Turbinates
	J34.89	Other Specified Disorder of Nose and Nasal Sinuses
	J34.9	Unspecified Disorder of Nose and Nasal Sinuses

HCPCS II Device Codes[2]

These codes are used by the entity that purchased and supplied the medical device, DME, drug, or supply to the patient. Medicare provides C-codes for hospital use in billing Medicare for medical devices in the outpatient setting. Although other payers may also accept C-codes, regular HCPCS II device codes are generally used for billing non-Medicare payers.

ASCs, however, usually should not assign or report HCPCS II device codes for devices on claims sent to Medicare. Medicare generally does not make a separate payment for devices in the ASC. Instead, payment is "packaged" into the payment for the ASC procedure. ASCs are specifically instructed not to bill HCPCS II device codes to Medicare for devices that are packaged.[3]

Device or Product	HCPCS	Description / Comment
ENT Slide-On® Endosheath® System[4]	A4270	Disposable endoscope sheath, each
NuVent™ EM Sinus Dilation System[5]	C1726	Catheter, balloon dilation, non-vascular
MeroGel® Bioresorbable Nasal Packing Products[4]	C1763	Connective tissue, non-human (includes synthetic)
MeroPack® Bioresorbable Nasal Dressing and Sinus Stent[4]	C1763	Connective tissue, non-human (includes synthetic)
Nasal Septal Button	N/A[6]	Consider reporting associated charges under general revenue code 270 for medical-surgical supplies.
ALAR™ Nasal Valve Stents [4]	N/A[6]	Consider reporting associated charges under general revenue code 270 for medical-surgical supplies.
Powered Surgical Equipment: Console, Microdebrider, Burs & Blades	N/A[6]	Consider reporting associated charges under general revenue code 270 for medical-surgical supplies.
ENT Navigation System : Instruments & Accessories	N/A[6]	Consider reporting associated charges under general revenue code 270 for medical-surgical supplies.

1. Centers for Disease Control and Prevention, National Center for Health Statistics. International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM). http:// www.cdc.gov/nchs/icd/icd10cm.htm. Updated October 1, 2017. Accessed November 14, 2017.
2. Device C-codes are HCPCS Level II codes and are maintained by the Centers for Medicare and Medicaid Services. Healthcare Common Procedure Coding System. http://www.cms.gov/Medicare/Coding/HCPCSReleaseCodeSets/Alpha-Numeric-HCPCS.html. Accessed November 14, 2017.
3. ASCs should report all charges incurred. However, only charges for non-packaged items should be billed as separate line items. Because of a Medicare requirement to pay the lesser of the ASC rate or the line-item charge, breaking these packaged charges out onto their own lines can result in incorrect payment to the ASC. Centers for Medicare and Medicaid Services. Medicare Claims Processing Manual, Chapter 14—Ambulatory Surgical Centers, Section 40. http://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/downloads/clm104c14.pdf. Accessed November 15, 2017. See also MLN Matters SE0742 p.9-10: Centers for Medicare and Medicaid Services. MLN Matters Number SE0742 Revised. http://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNMattersArticles/downloads/SE0742.pdf. Accessed November 15, 2017.
4. Slide-On® EndoSheath®, MeroGel® and MeroPack® are registered trademarks of Medtronic, Inc.
5. NuVent™ and ALAR™ are trademarks of Medtronic, Inc.
6. N/A indicates that CMS and other payers do not have a need for these items to be individually identified, although the associated charges must still be reported. When hospitals use a device or supply that does not have a HCPCS II code, they should report the charges in the general revenue code for the item, typically revenue code 270 for Medical-Surgical Supplies.

Physician Coding and Payment — Effective January 1, 2018

CPT® Procedure Codes

Physicians use CPT codes for all services. Under Medicare's Resource-Based Relative Value Scale (RBRVS) methodology for physician payment, each CPT code is assigned a point value, known as the relative value unit (RVU), which is then converted to a flat payment amount.

Procedure	CPT Code and Description[1]	Surgical Global[8]	Medicare RVUs[2]		Medicare National Average[3]	
			For physician services provided in:[4]			
			Physician Office[5]	Facility	Physician Office[5]	Facility
Computerized Tomography[6]	**70486** Computed tomography, maxillofacial area, without contrast material (CT Sinus)	N/A	3.94	N/A	$142	N/A
Surgical Navigation[7]	**61782** Stereotactic computer-assisted (navigational) procedure, cranial, extradural	N/A	N/A	5.01	$180	$180
Inferior Turbinate resection/ ablation, Rhinoplasty, Septoplasty, & Sinus Lavage[8,9]	**30110** Excision nasal polyp (s), simple	010	6.44	3.67	$232	$132
	30115 Excision nasal polyp (s), extensive	090	N/A	12.09	$435	$435
	30140 Submucous resection, inferior turbinate, partial or complete, any method[10]	000	7.81	5.12	$281	$184
	30420 Rhinoplasty, primary; including major septal repair	090	N/A	38.41	$1,383	$1,383

Physician Coding and Payment continued

2. Centers for Medicare & Medicaid Services. Medicare Program; Revisions to Payment Policies Under the Physician Fee Schedule and Other Revisions to Part B for CY 2018; Medicare Shared Savings Program Requirements; and Medicare Diabetes Prevention Program Final Rule. 82 Fed. Reg. 52976-53371. https://www.gpo.gov/fdsys/pkg/FR-2017-11-15/pdf/2017-23953.pdf. Published November 15, 2017. Accessed November 15, 2017. The total RVU as shown here is the sum of three components: physician work RVU, practice expense RVU, and malpractice RVU.
3. Medicare national average payment is determined by multiplying the sum of the three RVUs by the conversion factor. The conversion factor for CY 2018 is $35.9996 per 82 Fed. Reg. 52976-53371. httpshttps://www.gpo.gov/fdsys/pkg/FR-2017-11-15/pdf/2017-23953.pdf. Published November 15, 2017. Accessed November 15, 2017. Final payment to the physician is adjusted by the Geographic Practice Cost Indices (GPCI). Also note that any applicable coinsurance, deductible, and other amounts that are patient obligations are included in the payment amount shown.
4. The RVUs shown are for the physician's services and payment is made to the physician. However, there are different RVUs and payments depending on the setting in which the physician rendered the service. "Facility" includes physician services rendered in hospitals, ASCs, and SNFs. Physician RVUs and payments are generally lower in the "Facility" setting because the facility is incurring the cost of some of the supplies and other materials. Physician RVUs and payments are generally higher in the "Physician Office" setting because the physician incurs all costs there.
5. "N/A" shown in Physician Office setting indicates that Medicare has not developed RVUs in the office setting because the service is typically performed in a facility (e.g. in hospital). However, if the local contractor determines that it will cover the service in the office, then it is paid using the facility RVUs at the facility rate. Centers for Medicare & Medicaid Services. Details for Title: CMS-1676-F. CY 2018 PFS Final Rule Addenda. Addendum A: Explanation of Addendum B and C. https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Federal-Regulation-Notices-Items/CMS-1676-F.html . Released November 2, 2017. Accessed November 17, 2017.
6. Allowable rate includes both the technical and professional components. When billing for professional service only, a 52 modifier would be added and allowable rate would be reduced accordingly.
7. As medically necessary, the use of a stereotactic guidance system may be reported in addition to the appropriate codes for the primary ENT procedure. Documentation should explain both the medical necessity and pre-planning activities. CPT code 61782 is an "add-on" code and must be reported in addition to the primary procedure.
8. Surgical procedures are subject to a "global period." The global period defines other physician services that are generally considered part of the surgery package. The services are not separately coded, billed, or paid when rendered by the physician who performed the surgery. These services include: preoperative visits the day before or the day of the surgery, postoperative visits related to recovery from the surgery for 10 days or 90 days depending on the specific procedure, treatment of complications unless they require a return visit to the operating room, and minor postoperative services such as dressing changes and suture removal.
9. Medicare permits the use of bilateral modifier -50 for bilateral procedures. Centers for Medicare and Medicaid Services. Transmittal 1421, CR 8853. http://www.cms.gov/Regulations-and-Guidance/Guidance/Transmittals/Downloads/R1421OTN.pdf. Released August 15, 2014. Accessed November 20, 2017. See also Medicare Claims Processing Manual, Chapter 12—Physicians/Nonphysician Practitioners, section 40.7.B. https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/clm104c12.pdf. Accessed November 20, 2017. See also National Correct Coding Initiative (NCCI) Edits Policy Manual. https://www.cms.gov/Medicare/Coding/NationalCorrectCodInitEd/index.html. Published October 31, 2017. Accessed November 20, 2017.
10. Coding for turbinoplasty procedures is based on whether bone was removed during procedure. Soft tissue reduction of turbinates, without removal of bone, is reported with code 30802. If bone is removed, it is reported with 30140. Turbinoplasty and outfracture are sometimes performed together. According to NCCI edits and/or CPT descriptions, CPT code 30930 should not be billed with 30140. If CPT codes code 30802 and 30930 are reported together, only one code is paid unless procedures are performed independently on opposite sides.
11. CPT 30465 is used to report a bilateral procedure. For unilateral procedure, use modifier 52.
12. You may also report a separate code when you harvest graft material through a separate incision (e.g. 20912- Cartilage graft; nasal septum). However, if a septoplasty (CPT 30520) is performed and reported during the same operative session, then you may not separately report graft harvest.
13. CPT Assistant, January 2010/Volume 20, Issue 1 .

Hospital Outpatient Coding and Payment — Effective January 1, 2018

CPT® Procedure Codes

Hospitals use CPT codes for outpatient services. Under Medicare's APC methodology for hospital outpatient payment, each CPT code is assigned to an APC. Each APC has a relative weight that is then converted to a flat payment amount. Multiple APCs can sometimes be assigned for each encounter, depending on the number of procedures coded and whether any of the procedure codes map to a Comprehensive APC (C-APC).

A CPT procedure code assigned to C-APC is considered a primary service, and all other procedures and services coded on the bill are considered adjunctive to delivery of the primary service. This results in a single APC payment and a single beneficiary copayment for the entire outpatient encounter, based solely on the primary service. Separate payment is not made for any of the other adjunctive services. Instead, the payment level for the C-APC is calculated to include the costs of the other adjunctive services, which are packaged into the payment for the primary service.

When more than one primary service is coded for the same outpatient encounter, the codes are ranked according to a fixed hierarchy. The C-APC is then assigned according to the highest ranked code. In some special circumstances, the combination of two primary services leads to a "complexity adjustment" in which the entire encounter is re-mapped to another higher-level APC.

As shown on the tables below, the procedures that are subject to C-APCs are identified by status indicator J1.

Procedure	CPT Code and Description[1]	APC[2]	APC Title[2]	SI[2,3]	Relative Weight[2]	Medicare National Average[2,4]
Surgical Navigation	**61782** Stereotactic computer-assisted (navigational) procedure, cranial, extradural	N/A	N/A	N	N/A	N/A

Published December 14, 2017. Accessed January 2, 2018.
3. Status Indicator (SI) shows how a code is handled for payment purposes: J1 = paid under a comprehensive APC, single payment based on primary service without separate payment for other adjunctive services; N = packaged service, no separate payment; S = always paid at 100% of rate; T = paid at 50% of rate when billed with another higher-weighted T procedure.
4. Medicare national average payment is determined by multiplying the APC weight by the conversion factor. The conversion factor for 2018 is $78.636. The conversion factor of $78.636 assumes that hospitals meet reporting requirements of the Hospital Outpatient Quality Reporting Program. Centers for Medicare & Medicaid Services. Medicare Program: Hospital Outpatient Prospective Payment System and Ambulatory Surgical Center Payment Systems and Quality Reporting Programs Final Rule. 82 Fed. Reg. 52356-52637. https://www.gpo.gov/fdsys/pkg/FR-2017-11-13/pdf/2017-23932.pdf . Published November 13, 2017. Accessed November 16, 2017. Payment is adjusted by the wage index for each hospital's specific geographic locality so payment will vary from the national average Medicare payment levels displayed. Also note that any applicable coinsurance, deductible, and other amounts that are patient obligations are included in the national average payment amount shown.
5. Medicare permits the use of bilateral modifier -50 . Centers for Medicare and Medicaid Services. Transmittal 1421, CR 8853. http://www.cms.gov/Regulations-and-Guidance/Guidance/Transmittals/Downloads/R1421OTN.pdf. Released August 15, 2014. Accessed November 20, 2017. See also Medicare Claims Processing Manual, Chapter 4—Part B Hospital, sections 20.6 and 20.6.2. https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/clm104c04.pdf . Accessed November 20, 2017.
6. Coding for turbinoplasty procedures is based on whether bone was removed during procedure. Soft tissue reduction of turbinates, without removal of bone, is reported with code 30802. If bone is removed, it is reported with 30140. Turbinoplasty and outfracture are sometimes performed together. According to NCCI edits and/or CPT descriptions, CPT code 30930 should not be billed with 30140. If CPT codes code 30802 and 30930 are reported together, only one code is paid unless procedures are performed independently on opposite sides.
7. CPT 30465 is used to report a bilateral procedure. For unilateral procedure, use modifier 52.
8. You may also report a separate code when you harvest graft material through a separate incision (e.g. 20912- Cartilage graft; nasal septum). However, if a septoplasty (CPT 30520) is performed and reported during the same operative session, then you may not separately report graft harvest.
9. CPT Assistant, January 2010/Volume 20, Issue 1

ASC Coding and Payment — Effective January 1, 2018

CPT® Procedure Codes

ASCs use CPT codes for their services. Medicare payment for procedures performed in an ambulatory surgery center is based on Medicare's ambulatory patient classification (APC) methodology for hospital outpatient payment. However, Comprehensive APCs (C-APCs) are used only for hospital outpatient services and are not applied to procedures performed in ASCs.

Each CPT code designated as a covered procedure in an ASC is assigned a comparable weight as under the hospital outpatient APC system. This is then converted to a flat payment amount using a conversion factor unique to ASCs. Multiple procedures can be paid for each claim. Certain ancillary services, such as imaging, are also covered when they are integral to covered surgical procedures, although they may not be separately payable. In general, there is no separate payment for devices; their payment is packaged into the payment for the procedure.

Procedure	CPT Code and Description[1]	Payment Indicator[2,3]	Multiple Procedure Discounting[5]	Relative Weight[2,4]	Medicare National Average[2,4]
Surgical Navigation	**61782** Stereotactic computer-assisted (navigational) procedure, cranial, extradural	N1	N	N/A	N/A
Inferior Turbinate resection/ ablation, Rhinoplasty, Septoplasty, & Sinus Lavage[6,7]	**30115** Excision nasal polyp(s), extensive	A2	Y	20.8962	$952
	30140 Submucous resection, inferior turbinate, partial or complete, any method[8]	A2	Y	20.8962	$952
	30420 Rhinoplasty, primary; including major septal repair	A2	Y	47.0099	$2,142
	30465 Repair of nasal vestibular stenosis (eg, spreader grafting, lateral nasal wall reconstruction)[9,10]	A2	Y	47.0099	$2,142
	30520 Septoplasty or submucous resection, with or without cartilage scoring, contouring or replacement with graft[10]	A2	Y	20.8962	$952
	30620 Septal or other intranasal dermatoplasty	A2	Y	47.0099	$2,142
	30630 Repair nasal septal defect	A2	Y	20.8962	$952
	30801 Cautery and/or ablation, mucosa of inferior turbinates, unilateral or bilateral, any method; superficial	A2	Y	13.0092	$593
	30802 Ablation, soft tissue of inferior turbinates, unilateral or bilateral, any method (eg. electrocautery, radiofrequency ablation, or tissue volume reduction), intramural (ie. submucosal)[8]	A2	Y	13.0092	$593
	30930 Fracture nasal inferior turbinate(s), therapeutic[8]	A2	Y	20.8962	$952
	31000 Lavage by cannulation; maxillary sinus (antrum puncture or natural ostium)	P2	Y	2.0402	$93
	31002 Lavage by cannulation; sphenoid sinus (antrum puncture or natural ostium)	R2	Y	13.0092	$593
Nasal and Sinus Endoscopy [6,7]	**31231** Nasal endoscopy, diagnostic, unilateralor bilateral (separate procedure)	P2	Y	1.7954	$82
	31233 Diagnostic endoscopy of nose and maxillary sinus via inferior meatuspuncture	A2	Y	4.2916	$196
	31237 Nasal/sinus endoscopy, surgical; with biopsy, polypectomy or debridements (separate procedure)	A2	Y	12.9066	$588

Procedure	CPT Code and Description[1]	Payment Indicator[2,3]	Multiple Procedure Discounting[5]	Relative Weight[2,4]	Medicare National Average[2,4]
Nasal and Sinus Endoscopy[6,7] (Continued)	**31238** Surgical endoscopy of nose with control of nasal hemorrhage	A2	Y	12.9066	$588
	31240 Nasal/sinus endoscopy, surgical; with concha bullosa resection	A2	Y	12.9066	$588
New for 2018	**31253** Nasal/sinus endoscopy, surgical with ethmoidectomy, total (anterior and posterior) including frontal sinus exploration; with or without removal of tissue from frontal sinus	G2	Y	38.7938	$1,768
	31254 Nasal/sinus endoscopy, surgical; with ethmoidectomy, partial (anterior)	A2	Y	38.7938	$1,768
	31255 Nasal/sinus endoscopy, surgical; with ethmoidectomy, total (anterior and posterior)	A2	Y	38.7938	$1,768
	31256 Nasal/sinus endoscopy, surgical, with maxillary antrostomy	A2	Y	25.1960	$1,148
New for 2018	**31257** Nasal/sinus endoscopy, surgical with ethmoidectomy, total (anterior and posterior) including sphenoidotomy	G2	Y	38.7938	$1,768
New for 2018	**31259** Nasal/sinus endoscopy, surgical with ethmoidectomy, total (anterior and posterior) including sphenoidotomy, with removal of tissue from sphenoid sinus	G2	Y	38.7938	$1,768
	31267 Nasal/sinus endoscopy, surgical, with maxillary antrostomy; with removal of tissue from maxillary sinus	A2	Y	38.7938	$1,768
	31276 Nasal/sinus endoscopy, surgical with frontal sinus exploration; with or without removal of tissue from frontal sinus	A2	Y	38.7938	$1,768
	31287 Nasal/sinus endoscopy, surgical, with sphenoidotomy	A2	Y	38.7938	$1,768
	31288 Nasal/sinus endoscopy, surgical, with sphenoidotomy; with removal of tissue from the sphenoid sinus	A2	Y	38.7938	$1,768
	31295 Nasal/sinus endoscopy, surgical; with dilation of maxillary sinus ostium (e.g. balloon dilation), transnasal or via canine fossa	P2	Y	38.7938	$1,768
	31296 Nasal/sinus endoscopy, surgical: with dilation of frontal sinus ostium (e.g. balloon dilation)	P2	Y	38.7938	$1,768
	31297 Nasal/sinus endoscopy, surgical; with dilation of sphenoid sinus ostium (e.g. balloon dilation)	P2	Y	38.7938	$1,768
New for 2018	**31298** Nasal/sinus endoscopy, surgical; with dilation of frontal and sphenoid sinus ostium (e.g. balloon dilation)	G2	Y	38.7938	$1,768
	CPT codes 31295, 31296 , 31297 and 31298 apply to cases in which a balloon catheter is the only instrument or tool used and no tissue is removed. Do not report 31295, 31296 , 31297 and 31298 with endoscopic sinus surgery codes when performed on same sinus. [11]

Applicable FARS/DFARS restrictions apply to government use.
2. Centers for Medicare & Medicaid Services. Medicare Program: Hospital Outpatient Prospective Payment System and Ambulatory Surgical Center Payment Systems and Quality Reporting Programs Final Rule. 82 Fed. Reg. 52356-52637. https://www.gpo.gov/fdsys/pkg/FR-2017-11-13/pdf/2017-23932.pdf . Published November 13, 2017. Accessed November 16, 2017. Correction Notice CMS-1678-CN. https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices-Items/CMS-1678-CN.html . Published December 14, 2017. Accessed January 2, 2018.
3. The Payment Indicator shows how a code is handled for payment purposes. N1=Packaged service/item; no separate payment made . A2 = Surgical procedure on ASC list in CY 2007; payment based on OPPS relative payment weight. G2= Non office-based surgical procedure added in CY 2008 or later; payment based on OPPS relative payment weight. P2 = Office-based surgical procedure added to ASC list in CY 2008 or later with MPFS non-facility PE RVUs; payment based on OPPS relative payment weight . R2 = Office-based surgical procedure added to ASC list in CY 2008 or later without MPFS non-facility PE RVUs; payment based on OPPS relative payment weight.
4. Medicare national average payment is determined by multiplying the relative weight by the ASC conversion factor. The 2017 ASC conversion factor is $45.575. The conversion factor of $45.575 assumes the ASC meets quality reporting requirements. Medicare Program: Hospital Outpatient Prospective Payment System and Ambulatory Surgical Center Payment Systems and Quality Reporting Programs Final Rule. 82 Fed. Reg. 52356-52637. https://www.gpo.gov/fdsys/pkg/FR-2017-11-13/pdf/2017-23932.pdf . Published November 13, 2017. Accessed November 16, 2017. Payment is adjusted by the wage index for each ASC's specific geographic locality, so payment will vary from the stated national average Medicare payment levels displayed. Also note that any applicable coinsurance, deductible, and other amounts that are patient obligations are included in the national average payment amount shown.
5. When multiple procedures are coded and billed, payment is usually made at 100% of the rate for the first procedure and 50% of the rate for the second and all subsequent procedures. These procedures are marked "Y." However, procedures marked "N" are not subject to this discounting and are paid at 100% of the rate regardless of whether they are submitted with other procedures.
6. For Medicare billing, ASCs use a CMS-1500 form.
7. Medicare does not recognize the use of bilateral modifier -50 for payment in the ASC and instructs that bilateral procedures should either be reported with the CPT procedure code repeated on two separate lines, or reported on a single line with units of "2". Centers for Medicare and Medicaid Services. Medicare Claims Processing Manual, Chapter 14—Ambulatory Surgery Centers, section 40.5: http://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/downloads/clm104c14.pdf. Updated May 23, 2008. Accessed November 20, 2017. See also Centers for Medicare and Medicaid Services. Transmittal 1421, CR 8853, 4-General Processing Instructions. http://www.cms.gov/Regulations-and-Guidance/Guidance/Transmittals/Downloads/R1421OTN.pdf. Released August 15, 2014. Accessed November 20, 2017.
8. Coding for turbinoplasty procedures is based on whether bone was removed during procedure. Soft tissue reduction of turbinates, without removal of bone, is reported with code 30802. If bone is removed, it is reported with 30140. Turbinoplasty and outfracture are sometimes performed together. According to NCCI edits and/or CPT descriptions, CPT code 30930 should not be billed with 30140. If CPT codes code 30802 and 30930 are reported together, only one code is paid unless procedures are performed independently on opposite sides.
9. CPT 30465 is used to report a bilateral procedure. For unilateral procedure, use modifier 52.
10. You may also report a separate code when you harvest graft material through a separate incision (e.g. 20912- Cartilage graft; nasal septum). However, if a septoplasty (CPT 30520) is performed and reported during the same operative session, then

Rx only. Refer to product instruction manual/package insert for instructions, warnings, precautions and contraindications.
