**CAUTION:** Federal (USA) law restricts this device to sale, distribution, and use by or on order of a physician. Indications, contraindications, warnings, and instructions for use can be found in the product labeling supplied with each device.

The Riptide™ Aspiration System is intended for use in the revascularization of patients with acute ischemic stroke secondary to intracranial large vessel occlusive disease (within the internal carotid, middle cerebral M1 and M2 segments, basilar, and vertebral arteries) within 8 hours of symptom onset. Patients who are ineligible for intravenous tissue plasminogen activator (IV t-PA) or who fail IV t-PA therapy are candidates for treatment.

The React™ 71 Catheter is indicated for the introduction of interventional devices into the peripheral and neurovasculature.
