MEET SHAUNA

If Shauna’s story sounds familiar, talk to your doctor about OAB or visit: OABjourney.com and start your journey to relief.

"It was getting harder and harder to make it to the bathroom in time. I was waking up in the middle of the night after wetting the bed. I was diagnosed with overactive bladder (OAB). I tried medications with side effects but I still didn’t have control. Then this little device changed my life."

In addition to risks related to surgery, complications can include pain at the implant sites, new pain, infection, lead (thin wire) movement/migration, device problems, undesirable changes in urinary or bowel function, and uncomfortable stimulation (sometimes described as a jolting or shocking feeling). This therapy is not for everyone. This treatment is prescribed by your doctor. Please talk to your doctor to decide whether this therapy is right for you. Your doctor should discuss all potential benefits and risks with you. Although many patients may benefit from the use of this treatment, results may vary. Talk with your doctor about ways to minimize these risks. For further information, please call Medtronic at 1-800-328-0810 and/or consult Medtronic’s website at www.medtronic.com.
