

REMOTE MONITORING HAS BEEN SHOWN TO:

Communicate any heart rhythm and device changes which require attention

Reduce hospitalisations and ER visits

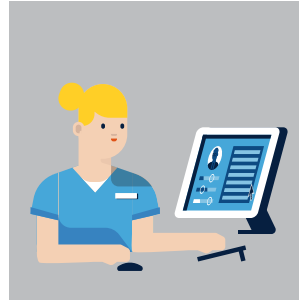

Increase Quality of Life

Provide you with a sense of security and peace of mind

HOW REMOTE MONITORING WORKS

1. SCHEDULE

Your clinic schedules dates for you to send information from your device to the clinic.

2. SEND

Device information is sent manually or automatically, depending on your heart device.

3. TRANSMIT

Device information travels from the remote monitor to your clinic.

4. REVIEW

Your clinic reviews your device information on a secure website.

WHY REMOTE MONITORING?

Your doctor wishes to receive information to monitor your implanted heart device – even when you're not at the clinic.

The Medtronic CareLink™ monitoring solutions provide a simple and convenient way for your implanted heart device to communicate with your doctor or clinic – increasing efficiency and peace of mind.

BE CONNECTED

Now that you have your heart device and remote monitoring solution, you can rely on us as your experienced **partner** when you have a question.
