

STROKE EDUCATION TOOLKIT

Dear Health Care Provider,

Hospitals across the world are seeing a decline in stroke admissions in response to the COVID-19 outbreak and fear of transmission. Given that this is a growing concern, we want to support you in spreading the critical message that patients should still seek care in the event of a medical emergency, even during a pandemic.

As a result, this **STROKE TOOLKIT** was developed to help support your public awareness and communication efforts, as needed.

STROKE TOOLKIT CONTENTS:

Click on the links to access the content and assets.

EMAIL TEMPLATE

for you to adapt and send to your patients. This email is intended to inform high-risk patients and/or stroke survivors to take precaution, and to still call 9-1-1 in the event of a medical emergency.

We will continue to periodically update this toolkit with new content, as it becomes available. For additional information and educational materials, please visit the [Medtronic Neurovascular website](#). **Together, let's spread this critical message, to keep people informed and encourage them to act quickly when a stroke strikes.**

On behalf of Medtronic, thank you for your partnership.
