Our dedication to transforming lives starts here

Value-based healthcare
- With value-based healthcare, advances in technology help deliver benefits for health systems and patients alike, with shared accountability for costs and outcomes.
- Value-based healthcare puts a premium on quality over quantity, shifting away from fee-for-services toward fee-for-value.

Integrated health solutions
We partner with hospital management and medical leaders to transform care pathways and clinical operations, with a shared goal of:
- Improving efficiency and outcomes
- Increasing patient and staff satisfaction
- Optimizing cost
With our extensive experience across and within regions, we provide proven and highly effective solutions. Solutions that can be quickly tailored to providers' specific needs, generating value now—and for the future.

Positive impact on complex and challenging conditions
- 70+ conditions in the human body treated with our therapies
- 2 people every second have their lives improved—and counting

Public-private partnerships
Increasing patient access in multiple communities aligns with the core of our Mission. These public-private partnerships—with outcome-oriented business models—create mutual benefits by making the best of our skills, expertise, and assets through the appropriate transfer of risk. They accelerate innovation-driven growth and actively contribute to the international push for universal health coverage. With jointly defined objectives, they address health system challenges efficiently, and in particular provide a route to bring our technologies to emerging markets, raising quality and delivering improved outcomes.
