

APP-BASED MONITORING CHECKLIST

MyCareLink Heart™ Mobile App

Welcome to the latest innovation in remote monitoring from Medtronic! Your heart device is equipped with BlueSync™ technology and is compatible with the **MyCareLink Heart™ mobile app** for an unmatched remote monitoring experience.

The MyCareLink Heart mobile app enables you to confidently and securely transfer your heart device information to your clinic as scheduled or requested by your doctor. The information can be sent wherever you take your mobile device. Cellular and Wi-Fi service availability applies.

Below is a list of everything you will need to set up the app. Please bring the following items to your next heart device appointment:

- Your smartphone or tablet.
Please ensure that your mobile device is sufficiently charged. Medtronic recommends that it is at least 50% charged.
- Your App Store ID and password
- A valid email address
- Your heart device serial number. The serial number can be found on your patient ID card.

GET STARTED NOW!

To learn more or to download the MyCareLink Heart mobile app before your next appointment, visit **www.MCLHeart.com**.

Please keep your mobile device and software current to stay connected to your clinic.
