

Medtronic

Why Nellcor™ in CCHD?

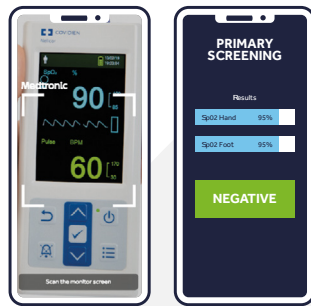

Critical Congenital Heart Disease (CCHD) is a serious clinical concern for newborns across the globe. Screen CCHD with Nellcor™ and avoid the risk of complications.

Medtronic's comprehensive offering presents a range of solutions to be the right partner in addressing CCHD.

Solution 1

Mobile screenings and automation

Simply scan the screen of your Nellcor™ hardware with the Nellcor CCHD Screening App to receive instant feedback.

Education and automated screening at the touch of a button

Easy, smart, consistent

The Nellcor™ CCHD Screening App is the perfect partner to our pulse oximetry hardware.

Solution 2

Technological excellence

Nellcor™ pulse oximetry system meets the 5 key challenges for new-borns:

- Speed
- Accuracy
- Motion
- Perfusion
- Sensitivity

Solution 3

Economic flexibility

Nellcor™ sensors are available in a range of disposable, semi-disposable and non-adhesive solutions, providing flexibility for every budget.

Solution 4

Clinical support

Access to a wealth of clinical evidence supporting CCHD screening strategies, including protocols from the United States and Europe, as well as key findings from 21 studies carried out on almost half a million patients.

Solution 5

Training and education

A comprehensive educational programme, delivering resources in multiple formats including online courses, live training events and access to Local Support Teams.

This material is for Healthcare Professionals in countries with applicable health authority product registrations.
