Midas Rex™ MR8™ High-Speed Drill System

Advancing
surgical
possibilities

Uncompromising access to the surgical site

For over 50 years, our Midas Rex™ platform has been the name in surgical drills. Like you, we don't rest on our past—we build upon it. That's because we innovate—while others imitate. We continue to be the leader in reliability, performance, and surgeon preference.

The Midas Rex™ MR8™ high-speed drill system has a lower operating temperature, less chatter, improved visibility of the surgical site, improved cutting performance. Navigable with the StealthStation™ S8 surgical navigation system, it seamlessly integrates with other technologies in our portfolio.

With our comprehensive support, education, training, and service, you have a partner that's there for you from start to finish.

Midas Rex™ MR8™ . It's not just a drill. It's advancing surgical possibilities.

Precision you can feel

Responsive. Comfortable. Efficient.

Our latest drill technology delivers smooth, precise bone cutting performance with a lightweight, compact handpiece design. So you can be confident during your procedures.

Streamlined attachment profiles for improved visibility

Adjustable tool exposure lengths

Engineered to reduce vibration

Lighter ergonomic design

Enhanced motor technology for longer drilling

Versatility you can see

Visibility. Functionality. Accessibility.

Our wide range of attachments have been redesigned to provide a more streamlined profile with flexible options you can tailor. So you have improved visualization and increased accessibility of the surgical site.

Expand your procedural applications

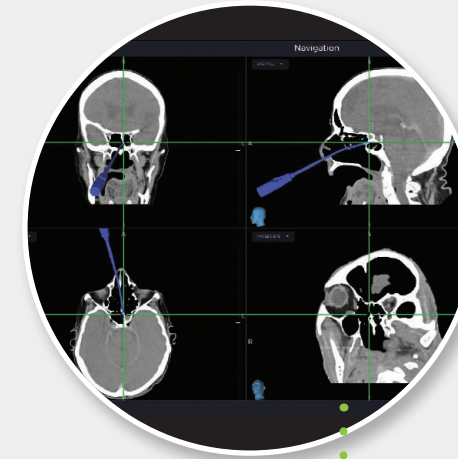

The Midas Rex™ MR8™ platform now integrates navigated highspeed drilling with the StealthStation™ S8 system for cranial applications.

With the addition of expanded cutting options, you have more cranial and spinal procedural applications, options, and flexibility than ever before.

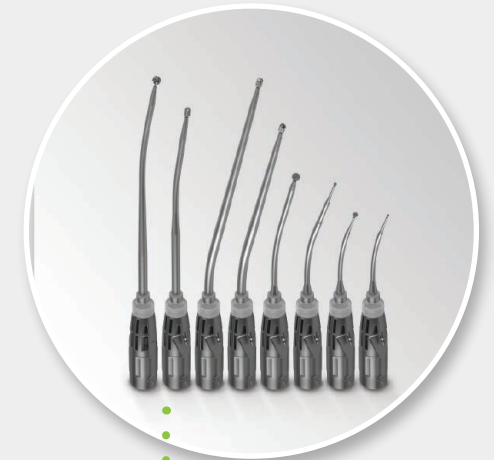

Spinal applications

Accommodate a variety of spine procedures. Our expanded offering of navigable tools means you have the cutting options you need. So you can accomplish your surgical goals with the least amount of disruption to the procedure and patient.

Cranial applications

Reliable, durable, and engineered for longevity. The Midas Rex™ MR8™ platform now integrates navigated high-speed drilling with the StealthStation™ S8 system for cranial applications. So you have real-time navigated drilling with a streamlined workflow.

MR8™ Midas Rex ClearView™

The expanded ClearView™ offerings broaden our portfolio of tools for the Midas Rex™ MR8™ platform. So you have more options for bone and biomaterials removal for lateral skull-base and posterior cervical applications.
