

Medtronic

InterVIEW® mobile platform

Stay connected

Keeping patients with chronic conditions connected and engaged in their care matters. InterVIEW is a user-friendly mobile platform that can help.

Studies show that patients who actively engage in their care may adhere better to their treatment plans,¹ have higher satisfaction,² and lower healthcare utilization.¹

With the InterVIEW mobile platform, patients provide symptomatic and objective health data with a Medtronic Care Management Services provided tablet or their own device. Routine participation provides important health information allowing you to see trends and develop interventions to engage your patients.

Enhance your patient view

Designed to improve clinician understanding of patient health status with:

- Video visits
- Multi-party video conferencing
- Image sharing
- Messaging to request additional health information

Engage patients

Designed to support the chronic patient population with:

- Reminders for improved program and care plan adherence
- Daily welcome messages for an encouraging experience
- Patient-centered design and functionality for ease of use³

Educate patients

Designed to help patients stay engaged in their care with:

- Educational videos integrated within daily health checks
- Videos assessed for patient understanding and actionability⁴
- A resource library of 70+ self-management videos plus health condition and recovery related articles

Gather program insights

Patient surveys offer the ability to gather non-clinical patient feedback with:

- Customizable survey questions
- Survey questions included after the health check to encourage response

InterVIEW mobile platform options

InterVIEW kit: Patients receive a kit with everything they need to use the InterVIEW mobile platform including tablet, instructions, and peripheral devices selected by their provider.

InterVIEW mobile app: Patients can download the InterVIEW mobile app on their own device. By using their own device, patients may find it easier to navigate InterVIEW and become more active in their care. Available for Android® and iOS® mobile operating systems.

Bluetooth® peripheral devices

- Blood pressure cuff and monitor
- Weight scale
- Pulse oximeter
- Glucometer

Device ordering

Let us handle the logistics so you can focus on patient care. Utilize our ordering services to perform direct-ship and pick-up options, or store and manage your own inventory.

Learn more

Remote patient monitoring is a flexible and scalable patient engagement option that helps support improved outcomes.
