

Active flexibility

Supportive secondary curve

Medtronic full-wall technology:
Encapsulated flat-wire braid enables thinner, more robust walls without compromising support, retention, or torque response.¹

Encapsulated wire braid

Balanced performance that's ahead of the curve

The Launcher guide catheter offers you a blend of flexibility, support, and visualisation – the capability you need to respond to your challenging cases.

Advanced platform designed for multiple interventional approaches¹

- Designed for radial and femoral approaches¹
- Soft distal segment enables you to actively engage the guide for backup support
- Full-wall technology construction provides kink resistance and stable torque control¹

Enhanced visualisation

- Large 5 F I.D. (0.058 inches) allows for increased contrast flow for enhanced visualisation²
- Vest-tech nylon outer jacket provides excellent hub-to-tip radiopacity³

Full range of traditional and specialty curves

- Extensive collection of specialty transradial and brachial curves

Launcher 5 F Guide Catheters
