

## MiniMed™ 780G system

# Life with diabetes just got easier

The Instinct sensor, made by Abbott and based on their most advanced CGM technology, is designed exclusively for the MiniMed™ 780G system.

Automated insulin 24/7, even when carb counts aren't exact<sup>†‡</sup>

### The MiniMed™ 780G system

- Meal Detection™ technology
- Flexible targets as low as 100 mg/dL
- Recommended settings: 100 mg/dL target with 2-hr AIT
- Missed bolus forgiveness<sup>§</sup>
- No fingersticks with SmartGuard™ technology<sup>◊</sup>
- Real-world results<sup>†¶</sup> showed 80% Time in Range<sup>¹</sup> with recommended settings

### NEW Instinct sensor

Brings cutting-edge technology of the latest Libre sensor exclusively to MiniMed systems

- Proven accuracy through real-time glucose readings
- World's smallest, thinnest<sup>#²</sup> sensor
- 15-day wear<sup>²</sup>
- Fewer changes, more time for life

## Help your patients get started by taking the next step

### How to Prescribe?

**Submit your prescription to Medtronic through Parachute Health.**

**Submit your prescription to Medtronic via fax:**

Fax: 818-576-6641

If we need any additional information, we will contact your office.

**Scan to download CMN.**

### Process to Prescribe

#### Directions section of the ePrescribe screen or on written prescriptions:

##### **MiniMed™ 780G pump**

Include the following:

- Indicate SmartGuard™ Target: 100 (recommended as clinically appropriate),<sup>†</sup> 110, and 120 mg/dL  
Note: System will default to 100 mg/dL.
- Indicate Active Insulin Time: 2 hours (recommended)
- SmartGuard™ Warmup/Manual Mode: Suspend before low (recommended) or Suspend on low

##### **Extended™ infusion set & reservoir**

Include the following:

- Total Daily Dose
- Indicate: Change infusion set & reservoir every 7 days (recommended)

##### **Instinct sensor**

Include the following:

- Indicate change sensor: Every 15 days (recommended)

##### **Simplera Sync™ sensor**

Include the following:

- Indicate change sensor: Every 7 days (recommended)

## How can your patients order the MiniMed™ 780G system?

### Existing Patients:

Encourage your patients to check their upgrade eligibility on [Diabetes.shop](https://www.diabetes.shop).

[Diabetes.shop](https://www.diabetes.shop) is where they can request the software upgrade and complete required training.

### New Patients:

Visit [medtronicdiabetes.com/get-started](https://medtronicdiabetes.com/get-started) or reach out to your local territory team.

<sup>†</sup> Refers to auto correct, which provides bolus assistance. Can deliver all correction doses automatically without user interaction, feature can be turned on and off.

<sup>‡</sup> Refers to SmartGuard™ feature. Individual results may vary.

<sup>§</sup> Taking a bolus 15 - 20 min before a meal provides significant improvement in post meal control. We recommend taking a meal bolus.

<sup>◊</sup> Fingersticks required in manual mode & to enter smartguard. If symptoms don't match alerts & readings, use a fingerstick. Refer to user guide. Pivotal trial participants spend avg of > 93% in SmartGuard

<sup>¶</sup> Due to inherent real-world study limitations, caution is advised when attempting to extrapolate these results to new patients. There could be significant differences.

# Among patient applied sensors.

Δ Glucose targets should be set following a consultation with your healthcare provider.
