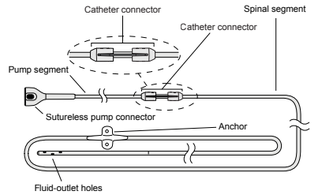
Intrathecal infusion products

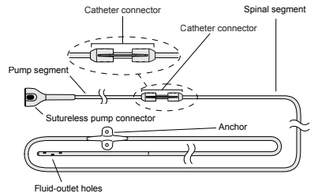
SynchroMed™ III intrathecal infusion system includes a 20 mL or 40 mL programmable pump, Ascenda™ catheter, and accessories for the management of severe spasticity and chronic pain.

Model 8667-20
Model 8667-40
SynchroMed™ III infusion pump

Model 8780
Ascenda™ catheter
114.3 cm in length



Model 8781
Ascenda™ catheter
139.7 cm in length



SynchroMed™ III infusion pumps

Model number	Description
8667-20	**SynchroMed™ III infusion pump (20 mL)** Programmable, 20 mL reservoir. *Sterile content:* (1) Pump (1) 22-gauge needle (1) 24-gauge needle *Nonsterile content:* Literature
8667-40	**SynchroMed™ III infusion pump (40 mL)** Programmable, 40 mL reservoir. *Sterile content:* (1) Pump (1) 22-gauge needle (1) 24-gauge needle *Nonsterile content:* Literature
8667A	**SynchroMed™ III procedure bundle** *Choice of (1):* 8667-20 SynchroMed™ III infusion pump (20 mL) 8667-40 SynchroMed™ III infusion pump (40 mL) *Choice of (1):* 8781 Ascenda™ catheter 8780 Ascenda™ catheter *Choice of (1):* 8591-38 Catheter passer (38 cm) 8591-60 Catheter passer (60 cm) *Kit includes:* 8551 Refill kit 8540 Catheter access port (CAP) kit
8667P	**SynchroMed™ III procedure bundle with myPTM™** *Choice of (1):* 8667-20 SynchroMed™ III infusion pump (20 mL) 8667-40 SynchroMed™ III infusion pump (40 mL) *Choice of (1):* 8781 Ascenda™ catheter 8780 Ascenda™ catheter *Choice of (1):* 8591-38 Catheter passer (38 cm) 8591-60 Catheter passer (60 cm) *Kit includes:* TH90T01 myPTM™ personal therapy manager 8551 Refill kit 8540 Catheter access port (CAP) kit

SynchroMed™ II Infusion Pumps

Model number	Description
8637-20	**SynchroMed™ II infusion pump (20 mL)** Programmable, 20 mL reservoir. *Sterile content:* (1) Pump (1) 22-gauge needle (1) 24-gauge needle *Nonsterile content:* Literature
8637-40	**SynchroMed™ II infusion pump (40 mL)** Programmable, 40 mL reservoir. *Sterile content:* (1) Pump (1) 22-gauge needle (1) 24-gauge needle *Nonsterile content:* Literature
8637A	**SynchroMed™ II procedure bundle** *Choice of (1):* 8637-20 SynchroMed™ II infusion pump (20 mL) 8637-40 SynchroMed™ II infusion pump (40 mL) *Choice of (1):* 8781 Ascenda™ catheter 8780 Ascenda™ catheter *Choice of (1):* 8591-38 Catheter passer (38 cm) 8591-60 Catheter passer (60 cm) *Kit includes:* 8551 Refill kit 8540 Catheter access port (CAP) kit
8637P	**SynchroMed™ II procedure bundle with myPTM™** *Choice of (1):* 8637-20 SynchroMed™ II infusion pump (20 mL) 8637-40 SynchroMed™ II infusion pump (40 mL) *Choice of (1):* 8781 Ascenda™ catheter 8780 Ascenda™ catheter *Choice of (1):* 8591-38 Catheter passer (38 cm) 8591-60 Catheter passer (60 cm) *Kit includes:* TH90T01 myPTM™ Personal Therapy Manager 8551 Refill kit 8540 Catheter access port (CAP) kit

SynchroMed™ clinician programmer

Model number	Description
CT900E	**Clinician programmer (Wi-Fi tablet)** The Model A810 clinician programmer application is intended for programming of the SynchroMed™ pumps. The clinician tablet (Model CT900E), the communicator (Model 8880T2), and patient data service application (Model A902) are required to use the A810 SynchroMed™ clinician programmer application. *Content:* (1) Tablet (1) Wall charger with USB cable (1) Tablet quick start guide *Nonsterile content:* Literature *Applications for download:* – A810 SynchroMed™ clinician programmer application – A902 Patient data service application – A901 Communication manager
8880T2	**Communicator** The Model 8880T2 Communicator is intended for use by clinicians to use in conjunction with the clinician tablet and clinician programmer app for communication with Medtronic neuromodulation medical devices. *Content:* (1) Communicator (1) USB connector cable (2) AAA alkaline batteries *Nonsterile content:* Literature

Intrathecal catheters

MODEL NUMBER	DESCRIPTION
8780	**Ascenda™ catheter (114.3 cm)** Four-layer catheter with an inner lumen of silicone tubing covered by a thermoplastic PET braid and a polyurethane outer jacket, sutureless pump connector, closed tip, and six side holes. 114.3 cm total length, 1.2 mm (4-Fr) outer diameter, 0.5 mm inner diameter, 1 cm interval markers on both spinal and pump segments. *Sterile content:* (1) Spinal segment with inserted guidewire (86.4 cm) (1) Pump segment with attached sutureless pump connector (27.9 cm), (1) Catheter connector with 2 attached collets (1) 16 T-gauge introducer needle (11.4 cm) (1) Bi-wing anchor with anchor dispenser tool *Nonsterile content:* (1) Ruler Literature
8781	**Ascenda™ catheter (139.7 cm)** Four-layer catheter with an inner lumen of silicone tubing covered by a thermoplastic PET braid and a polyurethane outer jacket, sutureless pump connector, closed tip, and six side holes. 139.7 cm length, 1.2 mm (4-Fr) outer diameter, 0.5 mm inner diameter, 1 cm interval markers on both spinal and pump segments. *Sterile content:* (1) Spinal segment with inserted guidewire (66 cm) (1) Pump segment with attached sutureless pump connector (73.7 cm) (1) Catheter connector with 2 attached collets (1) 16 T-gauge introducer needle (11.4 cm) (1) Bi-wing anchor with anchor dispenser tool *Nonsterile content:* (1) Ruler Literature

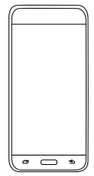
Catheter accessories and revision kits

Model number	Description
8782	**Ascenda™ intrathecal spinal segment revision kit** Used when a revision to the spinal segment of a model 8780 or model 8781 Ascenda™ intrathecal catheter is required. *Sterile content:* (1) Spinal segment with inserted guidewire (86.4 cm) (1) Catheter connector with 2 attached collets (1) 16 T-gauge introducer needle (11.4 cm) (1) Anchor with anchor dispenser *Nonsterile content:* (1) Ruler Literature
8784	**Ascenda™ pump segment revision kit** Used when a revision to the pump segment of the model 8780 or model 8781 Ascenda™ intrathecal catheter is required. *Sterile content:* (1) Pump segment with attached sutureless pump connector (73.7 cm) (1) Catheter connector with 2 attached collets *Nonsterile content:* (1) Ruler Literature
8785	**Ascenda™ accessory kit** Used with Ascenda™ intrathecal catheter models 8780, 8781, 8782, and 8784. *Sterile content:* (1) Bi-wing anchor with anchor dispenser tool (1) Anchor removal tool (1) Catheter connector with 2 attached collets
8786	**3.6-inch spinal needle** *Sterile content:* (1) 16 T-gauge introducer needle (9.1 cm)
8787	**6-inch spinal needle** *Sterile content:* (1) 16 T-gauge introducer needle (15.2 cm)
8578	**Sutureless pump connector revision kit for 8709SC Indura™** Used when a pump connector for an Indura™ 1P model 8709 or 8709SC catheter is required. *Sterile content:* (1) Catheter interface with attached sutureless pump connector, catheter, connector pin, and strain-relief (2) Strain-relief sleeves *Nonsterile content:* (1) Ruler Literature

Model number	Description
8596SC	**Pump segment revision kit for 8731SC (sutureless pump connector)** Replaces the pump segment of the model 8731SC intrathecal catheter. *Sterile content:* (1) Pump segment with attached sutureless pump connector (2) Opaque pump segment strain-relief sleeve (2) Transparent spinal segment strain-relief sleeve (1) Connector pin *Nonsterile content:* (1) Ruler Literature
8598A	**Spinal segment revision kit for 8731SC** Replaces the spinal segment of the model 8731SC intrathecal catheter. *Sterile content:* (1) Spinal segment with inserted guidewire (2) 15 T-gauge introducer needles (11.4 cm and 9.3 cm) (2) Transparent spinal segment strain-relief sleeve (2) Opaque pump segment strain-relief sleeve (1) V-wing anchor (1) Connector pin *Nonsterile content:* (1) Ruler Literature
8591-38	**Catheter passer (38 cm)** 38 cm hollow stainless-steel tunneling device with polypropylene obturator for use with catheters up to a 0.12 in. (3.0 mm) outside diameter. *Sterile content:* (1) Catheter passer (1) Tunneling obturator *Nonsterile content:* Literature
8591-60	**Catheter passer (60 cm)** 60 cm hollow stainless-steel tunneling device with polypropylene obturator for use with catheters up to a 0.12 in. (3.0 mm) outside diameter. *Sterile content:* (1) Catheter passer (1) Tunneling obturator *Nonsterile content:* Literature

myPTM™ personal therapy manager

Model number	Description
TH90T01	**myPTM™ personal therapy manager** myPTM is a handheld device that can be prescribed at time of implant with the SynchroMed™ pump. It allows a physician to set a therapeutic daily dose and allows the patient on-demand bolusing within limits. *Sterile content:* None *Nonsterile content:* (1) Personal therapy manager handset (1) Carrying case (1) Communicator (1) Charging cord Literature

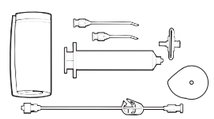


Power adapters

Model number	Description
PA9000	**PA9000 universal power adapter** The PA9000 universal power adapter is used to charge the myPTM™ personal therapy manager and 8880T2 communicator *Sterile content:* None *Nonsterile content:* (1) Power adapter (7) Wall plugs for different regions (1) Micro USB to USB-C adapter (1) USB cable

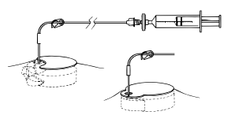
Refill kits

Model number	Description
8551	**Refill kit** *Sterile content:* (2) 22-gauge needles (1) Extension tubing set with clamp (1) 0.2-micron filter (1) 20 mL syringe (1) Template (1) Fenestrated drape *Nonsterile content:* Literature



Catheter access port kits

Model number	Description
8540	**Catheter access port (CAP) kit** *Sterile content:* (2) 24-gauge needles (1) Template (1) Extension tubing set with clamp (1) 10 mL syringe (1) 0.2-micron filter (1) Fenestrated drape *Nonsterile content:* Literature



Use ONLY for catheter access procedures
