Enhance your ventilator experience with our service agreement software options add-on

Upgrade your Puritan Bennett™ 980 ventilators with enhanced capabilities tailored to your specific areas of care.

Our software option upgrades offer powerful tools that may help to improve ventilation and patient care. This software option add-on includes our four software options that do not require you to upgrade your hardware:

- **High-Flow Oxygen Therapy software:** enables effective high-flow oxygen delivery. Software provides flows of up to 50 L/min in neonatal and pediatric patients and up to 80 L/min in adult patients.
- **NeoMode 2.0 software†:** delivers specialized neonatal ventilation to patients weighing 300 grams to 7.5 kg.
- **NIV+ software:** monitors pressure at the patient interface to help reduce the uncertainty around pressure delivery to neonatal patients.
- **IE Sync™ software:** enhances patient-ventilator synchronization, that may help in improving treatment outcomes.

Along with these software option upgrades, we will also update your ventilators to the latest operating software and firmware.

Now, access all four of these options at no additional charge, when you initiate a new Premium or Premium Plus service agreement for 10 or more Puritan Bennett™ 980 ventilators, a value of \$2,800 per ventilator. To further enhance your PB980 ventilator systems, add the Integrated Nebulizer software option‡ for \$600 per ventilator, valued at \$1,000‡.

Integrated Nebulizer is designed to power and control the Aerogen™ nebulizer to deliver physician-prescribed medication for the patient.

† NeoMode 2.0 software does not include Proximal flow sensor. The proximal flow upgrade includes software and hardware, so it is excluded from this offer.

‡ If you opt for the Integrated Nebulizer software option, it includes some hardware that will be installed during the software upgrade. Only available while supplies last.

Additional terms and conditions

- Choose from quarterly or monthly payment options to pay over time, and we'll upgrade your fleet with the selected software suite at the time of your contract-included preventive maintenance event.
- If the Integrated Nebulizer option is selected, payment for this add-on is due during the first year of service coverage, regardless of coverage duration.
- Should your agreement be terminated early, the remaining balance of the Integrated Nebulizer add-on (if selected) will become payable in full.
