

Puritan Bennett™ 980 ventilator online course

Service Renewal Seminar

Overview

Customer biomedical engineering staff who attended the Puritan Bennett™ 980 Ventilator 5-Day Service Seminar are eligible to register for the Service Renewal Seminar after 18 months.

Course content is designed to help you maintain this critical care device according to the approved service requirements of Medtronic. This online renewal seminar is required every two years to provide you with the latest service protocols for system enhancements.

Curriculum

This course is conveniently available in an online, self-paced format. The training covers the following topics to promote Puritan Bennett™ 980 ventilator performance and patient safety:

- Ventilator applications and design updates
- Review of critical theory of pneumatic and electronic operations
- Updates to periodic and preventive maintenance procedures
- Review of service recommendations, troubleshooting, and error codes

Registration

For additional questions, details on pricing, or to register for this course, please contact the Service Seminar team:
