# Nebulization simplified

## Integrated nebulizer option for the Puritan Bennett™ 980 ventilator

The Puritan Bennett™ 980 ventilator includes an integrated nebulizer option – designed to power and control the Aerogen™* nebulizer, which delivers prescribed medication to patients.

It allows you to set, start, extend, and stop timed nebulization cycles directly on the ventilator's user interface – eliminating the need for the external controller and power supply.

On-screen options:
- Nebulization cycle time
  – Solo: 5–60 minutes – five minute increments, continuous
- Start, extend, or stop cycle

## Ordering information
