

Medtronic

Let's discuss Triclosan

A new meta-analysis shows triclosan-coated sutures are no better at preventing surgical site infection (SSI).¹ But they do cost more.²

Does your facility overspend on triclosan-coated sutures?

Make the switch to
non-triclosan-coated
sutures from Medtronic.

- Using high-quality studies, NIHR meta-analysis casts doubt on the results from previous studies.¹
- The FALCON study shows no evidence of a difference in the risk of SSI with triclosan-coated sutures versus non-triclosan-coated sutures.²
- The financial burden associated with triclosan-coated sutures is significant.²
